**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

**Claims 1-5 are presented for examination.**

#### ***Requirement for Election/Restrictions***

This application contains claims directed to the following patentably distinct species of pharmaceutically active agents for use in the claimed tablet (see claim 1) as disclosed in the specification at the paragraph bridging pages 12-13.

The species are independent and/or distinct for the following reasons:

Regarding the species of pharmaceutically active agent(s), the species are independent or distinct because the breadth of agents are structurally, chemically and functionally distinct from any one other agent encompassed by the presently claimed genus of pharmaceutically active agents such that a comprehensive search of the patent and non-patent literature for any one such agent would not necessarily result in a comprehensive search of any one or more of the other agents encompassed by the claims. Additionally, in consideration of the number and significant chemical, functional and structural variability of compounds actually claimed by such a genus, the disparate nature and breadth of agents encompassed by this genus precludes a quality examination on the merits, not only because a burdensome search would be required for the entire scope of the claim(s), but also because the consideration of the findings of such a search for compliance with the statutes and requirements set forth under 35 U.S.C. 101, 102, 103 and 112, would be unduly onerous. Further, though Applicant has recognized a common functionality to the claimed compounds, e.g., that they are capable of delivery to the eye via a tablet, it remains that the art does not necessarily recognize such a function as being shared by the entire claimed genera of agents and, as a result, does not necessarily recognize their equivalency or interchangeability.

Applicant is required, in reply to this action, to elect a single disclosed specie of pharmaceutically active agent from those specifically disclosed (see, e.g., pages 12-13 of the specification) or a generic pharmaceutically active agent not specifically disclosed.

Art Unit: 1614

Applicant is cautioned that the election of a particular specie of pharmaceutically active agent, wherein the elected specie(s) is/are not adequately disclosed or supported by the accompanying specification, may raise an issue of new matter under the written description requirement of 35 U.S.C. 112, first paragraph.

Currently, claims 1-5 are generic.

**Applicant is advised that a reply to this requirement must include identification of the single disclosed species of pharmaceutically active agent that is elected consonant with this requirement and a listing of all claims readable thereon, including any claims subsequently added.**

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. Please reference MPEP §809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though this requirement be traversed (37 C.F.R. 1.143) and (ii) an identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should Applicant traverse on the ground that the inventions or species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

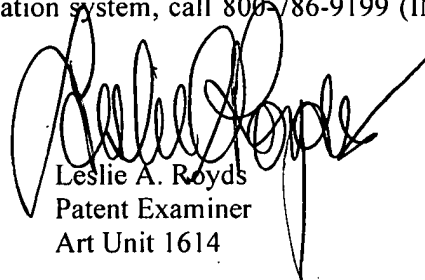

Art Unit: 1614

Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie A. Royds whose telephone number is (571)-272-6096. The examiner can normally be reached on Monday-Friday (9:00 AM-5:30 PM).
